Skills

Programming

- Python
- JavaScript
- TypeScript
- C#

Frontend

- Angular
- Blazor

Backend

- FastAPI
- Django
- ASP.NET Core
- Entity Framework Core

Database

- MySQL
- MS SQL Server
- MongoDB
- Postgres
- PGVector
- RedisVector

AI/ML

- LangChain
- LangGraph
- Pandas
- scikit-learn
- CrewAI

Profile

Final year AI undergraduate and a passionate developer with 4+ years of experience developing web applications using Angular, Python, ASP.NET Core, EF Core, MS SQL, and Firebase. I am also interested in GenAI, AI Agents, Prompt Engineering and ML and familiar with vector databases, frameworks like LangChain, LangGraph. I am eager to be challenged to grow and further improve my skills.

Education

BSc (Hons) in Artificial Intelligence 2022-2026

University of Moratuwa
SGPA - 3.88 out of 4.00 (Dean's List)

G.C.E. Advanced Level 2017-2020

Maliyadeva College
Z Score - 2.1484

Experience

Associate Software Engineer - AI 2025 Aug - Present

Ariso Technologies | Colombo

- Developed MCP tools and used them with LangGraph AI agents.
- Experienced with optimizing AI agents for reduce the response latency.
- Structuring AI agent outputs for WhatsApp automation.

Intern AI Engineer 2025 Feb - 2025 Aug

Ariso Technologies | Colombo

- Developed Agent Development Kit to create and orchestrate AI agents using Python
- Worked with vector databases like PGVector, Qdrant, Redis Vector for implement memory for AI agents.
- Experience with HashiCorp Consul as a service discovery for AI Agents
- Deployed and maintained AI agents on Linux servers.

Software Developer 2022 Jan - 2024 Dec

Crede Technologies | Canada (Remote)

- Hands-on experience developing web applications for the healthcare sector using ASP.NET Core, Blazor, jQuery, EF Core, Ant Design Blazor, and MS SQL.
- Developed reusable components using Ant Design Blazor, Blazor, and Bootstrap.

Other

- Git
- JIRA
- Docker
- GitHub Actions
- Linux
- Firebase

Soft Skills

Team Working

Adaptivity

Quick Learning

Problem solving

Languages

Sinhala - Native

English - Professional

Interest

Prompt Engineering

LLM Security

Listening Music

PC Gaming

Trainee Web Developer

2020 Dec - 2022 Jan

Crede Technologies | Canada

- Implemented Agile practices for project management, leveraging Jira for enhanced team coordination, prompt project completion, and the delivery of high-quality software solutions.
- Managed version control and code repositories with Git and BitBucket.
- Led the development of the core health portal using Django, jQuery, Bootstrap, and PostgreSQL, ensuring robust and scalable patient data management.

Freelance Angular Developer

2022 Jan - 2023 Dec

Self-employed | Remote

- Developed and maintained multiple web applications using Angular and Firebase.
- Collaborated with clients to design and implement responsive, scalable, and high-performance frontend solutions.

Projects

Call Center Communication Analyzer

[GitHub](#)

AI-based system to analyze customer feedback call recordings and provide insightful analytics and data visualizations.

Contribution:

- Full stack Development, Sentiment Analysis, Containerizing Backend, Creating CI/CD, Pipelines

Technologies:

- FastAPI, Angular, MongoDB, Redis, Celery, GitHub Actions, Docker, LangChain, AWS (S3 Bucket, EC2, Amazon Comprehend)

Online Ledger Management System

A ledger management system for a local client to manage their lending sale business customers' monthly payments and generate reports.

Contribution:

- Frontend Development

Technologies :

- Angular, Firebase(Firestore, Cloud Functions, Authentication), GitHub Actions

Blog Writing Assistant

[Github](#)

Agent based AI assistant for blog post writing in Medium platform. Take an existing blog as an input and gives improved blog article. It can generate or improve conclusion and introduction paragraphs, check grammar and spellings, generate SEO title and description for the blog and add markdown formatting for the blog.

Technologies:

- CrewAI, Streamlit, ChatGPT-4o LLM

Laptop Price Predictor

[Github](#)

A simple regression model for laptop price prediction. Trained using Kaggle dataset. Used techniques like One Hot Encoding, Hyper Parameter Tuning Used Random Forest Regressor. Predict the laptop price based on its specifications like RAM, CPU, Storage, etc

Technologies:

- Scikit-Learn, Pandas, Python

SQL Based Question Answering RAG Application

SQL database-based question and answering LLM application using Retrieval Augmented Generation.

Technologies:

- LangChain, Streamlit, ChatGPT-4o LLM, PostgreSQL PGVector
